About Me

Software Engineer with 3 years of professional experience in software development, technical problem-solving, and system analysis. Skilled in developing effective solutions, analyzing complex issues, and applying software development practices to deliver reliable results. A dedicated team player with strong analytical, communication, and adaptability skills, committed to continuous learning and professional growth.

Education

University of Moratuwa, Sri Lanka 2021–2025

BSc (Hons) in Information Technology – **GPA: 3.68**

AIB Sri Lanka | Diploma in Digital Marketing 2020–2021

Ananda College Colombo 2016–2019

G.C.E Advanced Level Examination | 2019

Physical Science Stream: Combined Mathematics–A | Physics—B | Chemistry—A | Z-score: 1.455 | old syllabus

Lyceum International School 2003–2015

G.C.E Ordinary Level Examination | 2015 – 9A's

Technical Skills

Core:
Java, Spring Boot, Spring Cloud, Spring Security, Hibernate/JPA

Front-End & UI:
React.js, Next.JS, HTML, CSS, JavaScript

Microservices & APIs:
Microservices architecture, REST / OpenAPI, SOAP, GraphQL, Apache Camel

Database:
MySQL, MSSQL, MongoDB

Cloud & DevOps:
GitHub Actions, Jenkins, SonarQube, AWS (CloudWatch, Batch, S3)

Observability:
Kibana, Grafana, OpsGenie incident response, Snowflake

Experiences

Software Engineer | **Sitecore** August 2025– 4th September 2026

- Provided advanced technical support for **Sitecore Search**, **Discover**, and **Send**, resolving configuration, API integration, data-ingestion, and web-crawling issues.
- Troubleshot customer implementations using client-server architecture and frontend technologies including HTML, CSS, JavaScript, and React.
- Analyzed application and infrastructure logs using **AWS CloudWatch**, **Elastic**, **Kibana** and **Snowflake** within a 24/7 production support environment.
- Handled 200 customer support cases while achieving an **90% customer satisfaction rating**.
- Managed escalated and **high-priority customer issues** through timely communication and coordination with customers, stakeholders, and engineering teams.

Software Engineer Intern | **DirectFN** January 2024– June 2024

- **GraphQL Integration**: Developed a GraphQL endpoint within the company's **ESB system** using **Spring Boot** and tested it using a test GraphQL server. Designed, developed, and tested ESB plugins, while supporting the migration of the ESB system from Apache Camel 3 to Apache Camel 4.
- **Unit Testing and Sonar /SNYK issue Fixing**: Improved unit test coverage using JUnit 5, Jetty, and Mockito. Resolved code quality and security issues identified by SonarQube and Snyk.
- **Frontend Development:** Contributed to frontend development using **React**, implementing and maintaining software features.
- **Team Collaboration:** Participated in daily stand-ups, sprint planning, and iteration retrospectives, collaborating with cross-functional teams to track development progress, resolve technical challenges, and support continuous improvement.

Technical Writing Intern | **Techylo Solutions** 2023– 2024

Software Developer | **MDK Food Products (Pvt) Ltd.** 2020– 2024

Developed an inventory management system using Java and React. Maintained the system, fixed issues, and implemented new features to meet business requirements. Provided IT support and assisted with resolving technical issues within the company.

Web Developer | Rotaract Club | University of Moratuwa

Prefect | Lyceum International School

Projects

Automated Step-By-Step Visual Performance Guide Generation from Sinhala Demonstration Videos

Final Year Project

A system that automatically creates visual performance guides from Sinhala demonstration videos, letting viewers to swiftly understand crucial information using synced text and images.

Technologies: NLP, Python

Procurement Management System | Second Year | Software Project

A software solution that helps organizations streamline and automate the process of purchasing goods, from the requisition of items to the payment to vendors, ensuring efficient procurement operations. This process also includes the selection of vendors and the filtering of appropriate items and services required by an organization.

Technologies: ReactJS, ASP.Net Core, MSSQL

Hospital Management System

A Hospital Management System using microservices architecture, with dedicated services for doctor management, patient management, and appointment scheduling, ensuring scalability and efficiency.

Technologies: Spring Boot, MYSQL

Weather-app

A simple and user-friendly app that provides accurate data on temperature, humidity, wind speed, and other weather conditions. The website includes all the cities in Sri Lanka and allows users to instantly search for weather updates in their desired location.

Technologies: React, Spring Boot

Password Management & Secure Generation Solution

This project is a solution that helps you securely store, organize, and manage your passwords for different websites and platforms. It allows you to easily access and view your credentials with a user-friendly interface. Additionally, it includes a robust password generator, enabling you to create strong, unique passwords for each account.

Technologies: ReactJS, MongoDB, NodeJS

Publications

Detection and Correction of Misspelled Content in Transcribed Sinhala

M.D.S.A.Kularathna and L. Ranathunga

2025 IEEE 19th International Conference on Industrial and Information Systems (ICIIS), Peradeniya, Sri Lanka, 2026, pp. 581-586.

DOI: 10.1109/ICIIS69028.2026.11450589

Certifications

Google Ads Search Certification

Google Analytics Individual Qualification

CS50: Introduction to Computer Science

Natural Language Processing | Great Learning Academy

Participations

Realhack 4.0 competition | participant

MoraXtreme 7.0 | participant

Event-OCTWAVE | Webinar on Artificial Intelligence and Machine Learning | participant
